1.	Indexes of array starts with	0
2.	Requirement and feedback are gathered from stakeholders and consumers in the _____ phase of the works	Plan Stage
3.	Methodology focuses on virtualization Flow	Kanban
4.	Scrum divides the development into short cycle called	Sprint cycles
5.	How to know the version jQuery	$.Ui.version
6.	Self-tag in HTML	 , <hr>, <img>,<meta>, <link>
7.	Is discriminative AI is used to train Generative to AI	False
8.	Methodology is useful when the client requirements are not clear and stable	Agile
9.	Is html name attribute is obstacle to an ancher tag	The statement is false
10.	Which attribute use for url in audio	SRC
11.	Which operator is used to get the range in Sql	Between
12.	what will product owner do in agile Environment	Look for customers
13.	Scrum a child methodology for day two day activities	Scrum
14.	Right or SQL query to extract only name part of an email address the part before @gmail.com	Select Substring-Index(Email-column) '@' 1)As name from your-table-name
15.	Key difference between EC2 and EPS	EB2 provides block level storage for use with EC2 instances
16.	_____ Will not accept null values	Primary Key
17.	In my MySQL the count function is used to count the number of rules retained by query	+
18.	Can binary search is applicable for unsorted array	False
19.	Empty placeholder in python?	Empty or null
20.	What is the syntax to run python	Python
21.	Expand RDS	Relational database services
22.	Is array is continuous or not	True
23.	Python is open source or not	Open source True
24.	Is python scripted language	Yes
25.	In Python which operator is used to select the element in given range	Colon(;)
26.	How to create empty in python	List[], Set(), Tuple(), dict{}
27.	EC2 instance or not	Yes Instance
28.	EC2 compute or not	Yes Compute
29.	Service For NoSQL database	Dynamo dB Mongo DB
30.	In transaction how to revert back to the previous version	Rollback
31.	Statement to decide to continue to exit the program to proceed to the next step are called	Control statement or conditional
32.	Statement Javascript lets you to execute if event occur	True
33.	What is not the current form of declaring	Employee Number, 9 employee
34.	In SQL the data is represented in the form of	Rows and table
35.	IAM | AMI	Identity and access management

Telegram @AccentureGuru

36.	The operator used to compare two values	==
37.	The variable type of array is declared by using	[]
38.	What is the purpose of using devops main object of the devops	Development, security operation
39.	Non-Functional requirements are tested by	System testing
40.	Metadata is described as _____ in SQL	Data dictionary
41.	In multiple branch pipeline name should not contain	Space, slashes, backslashes, special character
42.	Search requires array to be sorted	Binary
43.	Name the type of join used to include Rows that do not have matching values?	Outer join
44.	Agile technology does not accept change of requirement at any stage	False
45.	Devops maximize the conversion between development team and Operation Team	True
46.	In which phase of SDLC unit testing is performed	Construction
47.	What is the use of generative AI in video games	Vendor procedural data
48.	Why do we need devops	To maintain collab between Developmentand security team
49.	Agile metrology main purpose in terms of software developer	Fairly and faster access to consumer
50.	What is Array	Sequence randomly continues
51.	Inline views are utilize for writing complex sql queries without join and subquery operations	c)In correlated b)correlated subquery a) in line views
52.	IAAS Is a type of cloud computing services which offers a storage	False
53.	In Devops Infrastructure as code means	A)Practice of managing and and provisioning computer infrastructure practice of automatically providing stages environment at the time of deployment
54.	Which is the invocation period4 AWS Lamda	15 minutes
55.	What is the purpose of AWS S3	Object storage
56.	Of the following options use in natural language processing	Transformer
57.	Expand DOD	Definition of done
58.	Does CSS modular and path technique used in Jquery	Are not directly used but jquery does offer functionality that allows you to use DOM
59.	In which software development model boot testing and development happens parallel	We model
60.	Which of the following options use variations auto encoding	Image generation data compression semi supervisor

Telegram username @Accenture_Guru

		data impulsion Anonymous detection
61.	No SQL in AWS	Dynamo DB
62.	Comments in python	Single line- # multi line- “””
63.	CI | CD Stands for	Continuous integration continuous delivery
64.	No SQL Database	Non relational database document type, key value
65.	Agile methodology main purpose in terms of software development	Earlier and faster access to customers
66.	How to declare Length of an array	Number= [1,2,3,4,] Len(var)
67.	In multi branch pipeline name should not contain	Spaces
68.	To find an element in array	Search OR index
69.	To join n + 1 table how many join needed	n joins
70.	Difference between RDS and Amazon Mongodb RDS	No SQL- mangodb RDS -relational database services
71.	Tester + developer works on which model	v-model
72.	Devops svn subversion	Conflict resolution
73.	When we don’t know condition what type of control structure use	While
74.	Hello World 5 times loop base	for i in range(5): print("Hello World")
75.	Generative AI GPT prompt uses	Generative pre trained transformer
76.	What does IAM does	Manage access to AWS services add resources securely
77.	Devox maximize the conversion between development team and operation team	True
78.	Join Query Syntax Join orders on customer	SELECT * FROM orders JOIN customer ON orders.customer_id = customer.customer_id;
79.	What is security sprint	Involving in society on addressing security issues tasks and concerns
80.	Listing slicing problem	L[-2:-1] Prints last two numbers
81.	S3 bucket stores	Objects
82.	Gen AI will replace humans	No
83.	Service used for data warehouse and for business purpose	Aws Redshift
84.	In Sql Grouping of attributes by _____	Group by
85.	Scrum management is framework or not	Yes
86.	Array size 0-n	n+1
87.	Employee display no of records Query	Select *
88.	The statement within the loop must yet executed at least once	false

Telegram username @Accenture_Exam

89.	Information hiding is achieved through which oops	Encapsulation
90.	Arrow symbols in the flow chart is used to show	True
91.	Which of these are not agile methodology	BPM
92.	In code phase requirement and feedback	True
93.	Agile is useful when the client requirement or not	True
94.	An attribute with single atomic value is named as	Single valued
95.	Primary key can have null values	false
96.	Name the type of joint use in include rows that	Outer join
97.	Which one of the following is correct declaration in Java	Int array[][] = new int[4][5]
98.	At which level of testing the non functionality requirement are tested	Integrated testing
99.	Which of the following declaration will cause a compile time error	String[] nameArray = {5,3,2}
100.	Which of the given options are true with respect to arrays	The elements of an array can be accessed using index
101.	What kind of control structure is used	While
102.	Consider a scenario you have written a code to display menu	Do while loop
103.	Scrum divides the development into short cycle called	Sprints
104.	Many _____ are delivered in the agile process	
105.	Metadata is described as ____ In SQL	Data information
106.	_____is a conceptual framework where software is developed	Agile
107.	Which is not a color code in crystal methodology	
108.	Continuous delivery pipeline is the process which involves Building	True
109.	Which one will be the right option when working with the collection of item	Function
110.	Which statement is true with respect to merge command	March command performs upset
111.	Each branch enables you to implement different	Multi branch
112.	Which one of the given faces consumes more time duration the software lag cycle	Maintenance
113.	The custom table	Select clust_name
114.	Which of the following are activities of change control board	Filtering changes reviwing
115.
